***Detailed Action***

***Examiners Amendment***

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Mallie on 1-18-2005. The changes made below are underlined.

The claims are amended as follows

-- 44. (Previously Presented) An imaging method, comprising:  
transmitting x-rays through a single charge collection-layer; and receiving the x-rays incident on a semiconductor layer after the transmission through the single charge-collection layer, wherein the semiconductor layer is disposed above the single charge-collection layer, the semiconductor layer having a first surface adjacent to the single charge-collection layer and a second surface farther away from the single charge-collection layer relative to the first surface, and wherein receiving further comprises receiving the x-rays at the first surface of the semiconductor layer before the x-rays propagate through the semiconductor layer.--

Claim 45 is cancelled.

***Examiner's statement of reasons for allowance***

The following is an examiner's statement of reasons for allowance:

1. Claims 1,10,22,27,36,44,51-53, and 59 are allowed because prior art fails to teach a digital radiography imager having an x-ray converting layer with a first surface adjacent to an energy detection layer and a second surface on an opposite side to the energy detection layer, that is configured such that x-rays traverse the energy detection layer before propagating through the x-ray converting layer.

2. Claims 2-9,11-20,23-26,28-31,33-35,37-43,46-50,54-58, and 60-65 are allowed by virtue of their dependency upon allowed claims 1,10,22,27,36,44,51-53, and 59.

3. As described in applicants remarks filed 11-01-2004, the examiner agrees, that, although the Trauernicht (921) reference teaches the use of a detector that can be irradiated from the top or bottom direction, the specification only describes irradiation toward the top of the detector, and for that reason the Trauernicht (921) reference is not enabled, and therefore the rejection mailed 8-24-2004 is overcome.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

4. Any inquiry concerning this communication or earlier communications should be directed to Phillip Johnston whose telephone number is (571) 272-2475. The examiner can normally be reached on Monday-Friday from 7:30 am to 4:00 pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor John Lee can be reached at (571) 272-2477. The fax phone number for the organization where the application or proceeding is assigned is 703 872 9306.
